

# HOT JOB OF THE WEEK

---

## Civil Engineer

### *Department of Agriculture*

The U.S. Department of Agriculture (USDA) strives to provide leadership on food, agriculture, natural resources and related issues based on sound public policy, the best available science and efficient management. It aims to meet the needs of farmers and ranchers, promote agricultural trade and production, work to assure food safety, protect natural resources, foster rural communities, and end hunger in the United States and abroad. As a Civil Engineer, you will work in an inter-disciplinary environment with natural resource specialists to identify construction impact mitigations and incorporate best management practices into engineering projects. You will perform civil engineering project planning and program management duties, such as scheduling and layout of operations, planning for budget requirements, and inspection and surveillance of materials, methods and equipment used in tests and/or construction.

---

### **In your position as a Civil Engineer you will:**

- Perform survey and control field work associated with engineering projects.
- Prepare designs, technical drawings, sketches and specifications for engineering projects from a scope of manual calculation to computer aided design.
- Review construction project plans for practicability, availability of materials and suitability of specifications.

### **Requirements:**

- You must be a United States citizen or a U.S. national.
- You must show successful completion of a professional engineering curriculum leading to a bachelor's or higher degree in engineering in an accredited college or university.

**Salary:** 34,139.00 - 63,681.00 USD/ year

**Locations:** Throughout California

**Deadline:** March 7, 2010

**Contact Information:** Human Resources
